PROFESSIONAL SUMMARY

B.Tech (Computer Science & Engineering) graduate with First Division with Distinction and hands-on full-stack experience building production-style web applications using **Java, Spring Boot, React.js, and SQL/NoSQL databases**. Skilled in designing secure RESTful APIs with JWT authentication, applying layered (MVC) architecture, and managing code with Git/GitHub. Strong foundation in Data Structures, Algorithms, OOP, and DBMS. Seeking an entry-level Software Developer role to build reliable, real-world software.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), C++, JavaScript (ES6+), SQL

Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, RESTful APIs, JWT Authentication, Servlets, JSP, JDBC, Node.js, Express.js

Frontend: React.js, HTML5, CSS3, Responsive Web Design

Databases: MySQL, Oracle, PL/SQL, MongoDB

Tools & Platforms: Git, GitHub, Maven, Postman, Apache Tomcat, Eclipse, IntelliJ IDEA, VS Code, Linux

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, MVC Architecture, SDLC

EDUCATION

B.Tech in Computer Science & Engineering

2020 - 2024

Uttaranchal Institute of Technology, Uttaranchal University, Dehradun - **82.24% (First Division with Distinction)**

Post Graduate Certificate Programme (PGCP) in Advanced Computing

2026 (Pursuing)

C-DAC ACTS (Advanced Computing Training School)

PROJECTS

EcoLoop Nexus - Smart Waste Pickup Booking Platform

Team Lead

Tech Stack: Spring Boot 3, Java 17, MySQL, Spring Data JPA / Hibernate, Spring Security, React.js, JWT, Maven, Git/GitHub, Postman

- Led a 3-member team and owned the Admin module plus overall project coordination, defining the repository structure and Git branching strategy (*main / develop / feature* branches).
- Designed and developed secure **RESTful APIs with full CRUD operations** for waste-category management, protected using Spring Security and JWT-based authentication.
- Implemented a clean **layered architecture** (Controller - Service - Repository) with DTO validation and centralized exception handling.
- Tested all API endpoints in Postman and maintained version control and collaboration through Git and GitHub.

BreakBite - College Canteen Booking Platform

Full-Stack (Solo)

Tech Stack: React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, JavaScript

- Built a responsive frontend that lets students **pre-order meals during break time**, reducing canteen wait time and overcrowding.
- Independently extended the original frontend-only project into a full **MERN-stack application** by developing a Node.js / Express backend with MongoDB.
- Designed REST APIs for menu browsing, order placement, and order tracking.
- Presented the project to faculty and an external examiner during the final-year viva.

ACHIEVEMENTS & STRENGTHS

- Graduated B.Tech CSE with **First Division with Distinction (82.24%)**, maintaining consistent academic performance.
- Cleared the competitive **C-CAT entrance examination** for admission to C-DAC's Post Graduate Certificate Programme.
- Served as **Project Lead** for a 3-member team, owning end-to-end architecture and the Admin module of a full-stack platform.
- Self-driven learner with a disciplined daily practice routine in DSA and hands-on project building; comfortable across both Java and JavaScript backends.
